

Customer & User Guide

Complete reference on portal access, login credentials, language switching, and step-by-step patient and clinical staff workflows.

Platform: Web Application

Mode: Prototype Mode (Zero Email Verification)

Languages: English & العربية (Full RTL)

Document: Version 1.0.0

1. Portal Access & Required Credentials

The portal is configured in instant prototype mode. Accounts activate immediately upon registration without email verification links or confirmation codes.

Patient Portal Access

For patients booking appointments, viewing lab reports, and tracking medications.

Login URL: `/login`

Registration: `/signup`

Demo Email: `sarah.chen@example.com`

Demo Password: `password123`

One-Click Fill: `"Demo: Fill Sarah Chen credentials"`

Staff Clinical Workspace

Restricted clinical portal for doctors, nurses, and medical administrators.

Gateway URL: `/staff-portal`

Clinic Passcode: `APEX-STAFF-9021`

Demo Email: `dr.vance@clinic.demo`

Demo Password: `password123`

One-Click Fill: `"Demo: Fill Dr. Marcus Vance credentials"`

i Security Notice: The public site (`/login`, `/signup`) only permits patient accounts. Clinical staff accounts must sign in via the dedicated `/staff-portal` gateway and require the clinic security passcode (APEX-STAFF-9021).

2. Language & Layout Switching

The portal features a zero-reload language toggle in the top-right corner of the navigation bar on every page.

- Switch Button:** Labeled العربية when in English mode, and English when in Arabic mode.
- Instant Toggle:** Updates all text, headers, table columns, badges, and modals immediately without refreshing the page.
- Right-to-Left (RTL) Typography:** Switching to Arabic activates full right-to-left layout alignment and renders typography using the Google Cairo font.
- Session Persistence:** Your language choice is saved in your browser storage and persists across visits.

3. Patient Portal Walkthrough

1. Dashboard (/patient/dashboard)

The main overview screen displays your next confirmed doctor visit, your active medication list, and recent notifications from your care team.

2. Booking an Appointment (/patient/appointments)

1. Click "**Book appointment**" in the top navigation or on the appointments page.
2. Choose your attending doctor from the physician directory.
3. Select your preferred consultation date and time.
4. Type your consultation reason (e.g. "*Routine blood pressure follow-up*").
5. Click "**Confirm Booking**". The appointment status displays as **Pending** until confirmed by clinic staff.

3. Electronic Medical Records (/patient/records)

1. Click "**Medical Records**" in the sidebar.
2. Filter by category: **Lab Results**, **Visit Summaries**, or **Diagnoses**.
3. Review findings, clinical notes, and attending doctor remarks.
4. Click "**Export as Text**" to download a formatted clinical document.

4. Prescriptions & Medications (/patient/prescriptions)

1. Click "**Prescriptions**" in the sidebar.
2. Toggle between **Active Prescriptions** and **Past Medications**.
3. Check exact dosage (e.g. *10mg tablet*), dosing frequency (e.g. *Once daily with meals*), treatment dates, and doctor instructions.

5. Personal Profile & Emergency Contacts (/patient/profile)

Keep your contact telephone, home address, medical insurance carrier ID, and emergency contact details updated. Changes save immediately to your record.

4. Staff Clinical Workspace Walkthrough

1. Today's Clinical Queue (/staff/dashboard)

Real-time triage queue for all visits scheduled for the current day. Clinicians can manage appointments with one click:

- **Confirm:** Validates and confirms pending patient appointment requests.
- **Complete:** Marks completed consultations.
- **Cancel:** Cancels appointment slots.
- **Open Patient Chart:** Opens the patient's electronic health record directly from any appointment row.

2. Patient Directory (/staff/patients)

Searchable register across all enrolled patients. Filter by patient name, email, or telephone number to view demographics and open patient charts.

3. Electronic Health Chart (/staff/patients/[id])

- **Demographics Card:** Contact details, date of birth, insurance carrier, policy ID, emergency contacts, and home address.
- **Add Medical Record:** Click **"Add record"** to author lab reports, visit summaries, or diagnostic findings. Supports attaching documents (PDF, PNG, JPG).
- **Issue Prescription:** Click **"Add prescription"** to enter medication name, dosage, daily frequency, start/end dates, and pharmacy instructions.
- **Appointment History:** View full consultation history and update statuses directly.

5. Quick Reference Matrix

Role	Sign-In URL	Credentials	Allowed Capabilities
Patient	/login	sarah.chen@example.com Password: password123	Book consultations, view diagnostic lab reports, check prescription regimens, manage profile
New Patient	/signup	Full Name, Email, Password	Self-register an instant patient account
Staff Doctor	/staff-portal	dr.vance@clinic.demo Password: password123 Passcode: APEX-STAFF-9021	Triage daily queue, search patient directory, author medical records, issue electronic prescriptions
New Staff	/staff-portal → Register	Name, Title, Specialty, Email, Password Passcode: APEX-STAFF-9021	Provision an authenticated medical staff member
