

The Hospital Portal

Your complete, secure healthcare companion. Book clinical visits, access diagnostic reports, and manage active prescriptions from any device.

Document: Non-Technical User Guide **Version:** 1.0 (Production) **Classification:** Public / Patient Reference

1. Welcome to The Hospital Portal

The Hospital Portal is designed to make managing your medical care clear, comfortable, and accessible. You can schedule doctor appointments, check lab findings, review active medications, and manage personal emergency contacts without waiting on phone queues or navigating complicated menus.

Clear Clinical Communication

Every diagnosis, medication instruction, and appointment status is written in plain, human language so you always understand your care plan.

Bank-Grade Privacy & Protection

Your records and personal details are encrypted and isolated so that only you and your verified healthcare team have access.

2. Key Features at a Glance

24/7 Appointment Scheduling

Browse available doctors, view specialties (Cardiology, Pediatrics, General Practice), select your preferred time slot, and track confirmed or upcoming visits.

Diagnostic Records & Lab Results

Instant access to complete blood counts, imaging summaries, consultation notes, and doctor recommendations as soon as they are finalized.

Medication & Prescription Tracking

Keep a clear list of what medications you take, exact dosages, meal timings, prescribing physicians, and remaining refill quantities.

Health Profile & Emergency Care

Maintain your date of birth, insurance carrier number, known allergies, blood type, and emergency contacts in one secure location.

Peace of Mind Guarantee: The Hospital Portal is fully responsive and functions seamlessly on mobile phones, tablets, and desktop computers. No app store installation is required—simply open your web browser.

3. Step-by-Step Patient Walkthrough

1 Creating Your Patient Account

Visit the portal homepage and click "**Create Patient Account**". Enter your full name, email address, and a secure password. Your account is immediately created and initialized with full patient privacy protections.

2 Accessing Your Patient Dashboard

Once logged in, your personal dashboard displays your next upcoming appointment, any unread doctor notifications, active prescriptions, and recent lab results in clean, easy-to-read summary cards.

3 Scheduling a New Appointment

Navigate to **Appointments** → "**Book Appointment**". Choose your attending physician, select date and time, and type the reason for your visit (e.g. "*Routine blood pressure check*"). You'll receive instant confirmation.

4 Reviewing Diagnostic Reports

Under **Medical Records**, view past lab results, physical exams, and specialist consultations. Each record displays the date, doctor's findings, and clear follow-up advice.

5 Tracking Medications & Prescriptions

Open **Prescriptions** to check exact directions (e.g. "*Take 1 tablet every morning with water*"), refill dates, and doctor contact information.

4. For Hospital & Clinical Staff

Clinical staff and physicians access patient care records through the **Dedicated Staff Portal**. To ensure patient safety, staff access is strictly separated from patient self-service.

Workflow	Description	Staff Role Required
Staff Verification	Secure clinical badge entry requiring hospital-issued passcode authentication before clinical login.	Clinical Passcode
Patient Directory	Search registered patients by name or ID, review appointment attendance, and access medical history.	Doctor / Nurse
Schedule Management	Confirm appointment bookings, update visit status to <i>Completed</i> , and write visit consultation summaries.	Doctor / Reception
Clinical Records	Upload diagnostic test results, add treatment notes, and issue authorized digital prescriptions.	Attending Physician

5. Frequently Asked Questions (FAQ)

Can other patients see my medical records?

No. The portal uses Row Level Security (RLS). Your records are encrypted and tied strictly to your personal login. No other patient can see or search for your information.

Can anyone register as a doctor or nurse?

No. Public registration is locked strictly to patients. Clinical staff accounts must be provisioned through verified hospital channels with clinical security authorization.

What should I do in an emergency?

The Hospital Portal is designed for routine appointments, records, and prescriptions. If you are experiencing a medical emergency, please call **911** or visit your nearest hospital emergency department immediately.
